Women Should Walk Faster.

Mrs. Langtry always asserted and stoutly maintained that she owed the fineness of her skin and the brilliancy of her complexion to the rapid walk which she took daily. Many American women wa'k, but they are slow walkers. And the complexion specialists say that a slow walk is no tetter than none at all, except that it obliges the walker to breathe fresh, open air. which is always good. To get the full beneficial effects of a walk for the complexion, there must be rapid movement for the blood, quick breathing for the color in the cheeks, muscular exertion for the development of the whole body, including the chest and neck and chin, and, finally, the general exercise for calling to life the sluggish organs of the body. That is the general explanation. Practiced, it works wonders.

Unparalleled Indignities Offered the Armenians by Cruel and Ferocious Kurds and Circassians-Land Where There's No Justice and No Law.

Cling to Their Faith.

The recent horrible massacre of the Christians by the Turks in Armenia. Asia Minor, draws attention to that high-

ly picturesque but unfortunate and most unhapy region of the earth. Armenia claims the honor of being the cradle of the human race. According to tradition, the Garden of Eden was within her bounds, and after Noah left the ark on Mount Ararat he made his home in the midst of her terri-

tory. Armenia is as MGR. KRIMIAN. full of famous cities of the dead as Greece or Italy, but the fame belongs to a remoter and less familiar past. tle, crops, merchandise, furniture, and even houses are coolly appropriated by the cruel, ferocious Kurds and Circassians, with the tacit sanction of corrupt Turkish officials. Armenian Christians are not permitted to carry arms, while the Circassians and Kurds are armed and are encouraged to hunt them. The Christian Armenians generally live in the valleys and cultivate the soil, while the Kurds and Circassians are nomadic people and live high up on the mountains where they tend their flocks. Whenever they desire they swoop down upon the valleys, gathering in the fruits of the peaceful Armenians' labors and carrying away flocks and herds.

There is no justice and no law for the Armenian. An Armenian is not allowed to testify against a Turk and the latter hardly ever thinks of carrying out any obligation he may owe the Armenian. The tax collectors travel in bands and swoop down upon the villages like harpies, colno money, off he goes to prison until he pays, and the prisons are now full to overflowing with unfortunates such as these. lies at the door of England which fails to carry out her obligations to protect Christians in Turkey.

The Oldest People. According to their own annals, the Armenians are the oldest people in the world and the earliest Christian nation. They trace their origin back to Haig, the grandson of Noah, who, 2,000 years beuntil Vahe, the sixtieth in succession, fell in battle against Alexander the Great. In their earlier history they were a conquering nation and their empire once stretched from the Caspian Sea, on the east, to Cicilia, on the Mediterranean, on the west, and from the borders of Pontus, on the north, to the confines of Assyria, on the south. Then the population was 25,000,000 souls.

Though the Armenians are brave and seem to have all the elements of a military people, they have been held under subjection most of the time for 3,000 years. After being made at different times, away back in the dim past, part of the Assyrian, Medean and Persian empires, Armenia fell under the Greek kings of Syria, about 200 B. C. Since then the land has been conquered or overrun in turn by Romans, Parthians, Saracens, Mongols, Russians, and, last and worst, Turks, who first established their supremacy nearly five hundred years ago.

After calling attention to the urgen need of legislation for the relief of the personnel of the navy, the Secretary recommends that the enlisted force be instated that after this year the appropriations on this score will rapidly diminish, falling from \$13,259,393 next year to \$750,000 in the following year.
